2. How to use Linxura to control devices through IFTTT.

Step 1

Open your IFTTT app and then click 'Create'.

Step 2

Click 'Add' and search 'Linxura' to select Linxura as trigger.

Step 3
Click 'Linxura is triggered', then click 'Continue'.

Select trigger

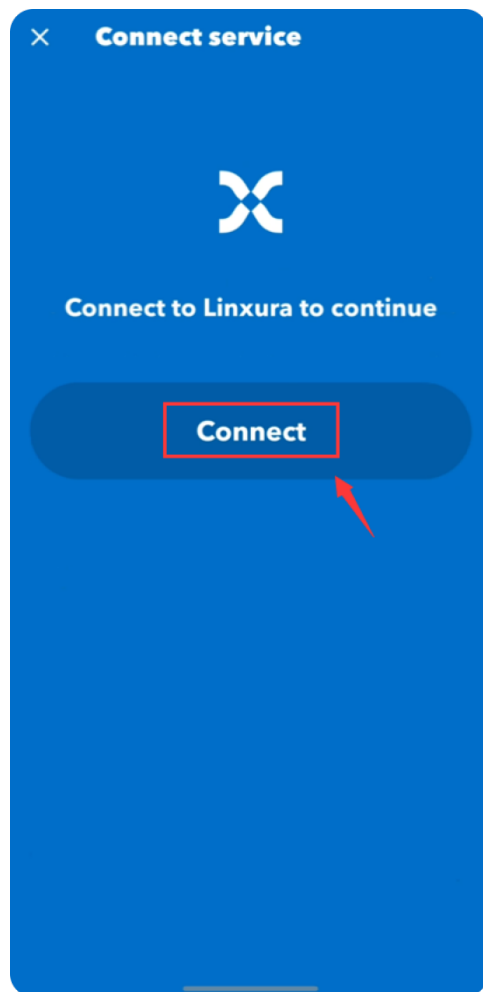

Linxura

Linxura is a small, portable smart home controller that lets you control all your smart home devices without the need for setting up additional hubs or multiple apps to use each of them. Linxura communicates directly with devices, and can also work through Amazon Alexa. Functions can be customized to work the way you like it. For example, you can click once to turn a device on, twice to turn it off, and click and hold to enable the wheel to be able to adjust different smart device functions such as brightness, temperature, volume, channel, etc.
